

Engineering Programs Leading to Bachelor's Degree Accredited by Japan Accreditation Board for Engineering Education (JABEE)

Last updated: 23 April, 2009

JABEE has accredited engineering programs in Japan since 2001. All listed here are engineering programs of four year undergraduate study/education leading to Bachelor's degree, and accredited by JABEE. The institutions have voluntarily requested that specific engineering programs be evaluated.

Programs are listed under Institutions of Higher Education and in alphabetical order of program titles. A year indicated after each program title is the school year when the specific program was first accredited by JABEE. Comprehensive review visits are normally conducted at five-yearly intervals. Students are deemed to have graduated from an accredited program providing they graduate from the program within its validity period of accreditation. Programs discontinued as well as programs whose accreditation validity has expired are identified by showing a final school year of accreditation. Discipline shows which "Supplementary Program Criteria by Field" in "Criteria for Accrediting Japanese Engineering Education Programs" is applied to review the program.

JABEE has been admitted as a full signatory to the Washington Accord since June 2005. Recognition of the substantial equivalency of the accredited engineering education programs by the other signatories of the Washington Accord has been effective since June 2005.
